

CivilCAD 10 Installation Guide

Pre-existing requirements for CivilCAD 10 installation:

- * If this is a fresh installation of CivilCAD, start from stage 6.
 - * If you upgrade from older version of CivilCAD to CivilCAD 2016, start from stage 1.
- 1) Go to: Start → Control Panel → Add or remove programs.
 - 2) Un-install CivilCAD 20XX.
 - 3) We recommend checking folder in: C:\Program Files\ and delete CivilCAD 20XX folder.
 - 4) In windows 7/8/10 OS – go to: C:\ProgramData\SivanDesign\ and delete CivilCAD folder.
 - 5) Install CivilCAD 10 from Setup_CivilCAD_10.exe.
- * You can use the CivilCAD 10 Installation Process Guide, which will guide you systematically through the installation process.
- 6) Load CivilCAD 10.
